Tool and Template Inventory

32. List 3-5 practical tools, templates, or supports in your system. What does each one help the learner build, decide, or navigate?

Map: Gives me an overview of everyone involved, what they need, what their role is, and what authority they have.

Interview: The interview lets me ask each person questions which helps me better understand the situation along with their concerns and what they need.

Evidence: The evidence helps me make sure I get all the concrete facts I need and tells me what is confirmed and what still needs to be confirmed.

Identity and Role Support

33. Write 3 identity-building questions that help learners discover what they bring to the work.

What decisions are you responsible for making?

What do you need from the other people involved to do your part?

What knowledge do you have that could help with the review?
