Validated Requirements Set

Week 4: What Must the System Do? - Andy C. · Revision 973

R-01 · functional

Requirement: The system must show if an appointment is held or ready and explain what held is depending on the situation.

Source: W04-S01 · Dana Ruiz

Rationale: Scheduling and Intake use held differently which causes confusion for the next step.

Acceptance check: When staff checks an appointment's status they should be able to tell whether it is held or ready and understand what held means in the specific situation.

Priority: Must · **Validation:** Confirmed by Dana Ruiz

Conflict or decision: The system must clearly show whether an appointment is waiting for confirmation, held because the visitor cannot move forward, or ready.

R-02 · user

Requirement: The system must allow staff to see the condition of an appointment. They should be able to see who changed the status and the next step.

Source: W04-S01 · Dana Ruiz

Rationale: This matters because it helps staff know what to do instead of calling around while the they wait.

Acceptance check: To check this staff should be given an appointment with an unclear status and identify who changed it, why it is held and what step to take next.

Priority: Must · **Validation:** Confirmed by Dana Ruiz

Conflict or decision: The system must clearly show whether an appointment is waiting for confirmation, held because the visitor cannot move forward, or ready.

R-03 · business

Requirement: The system must make sure a room and qualified clinician are available before offering a same-day appointment

Source: W04-S02 · Dr. Lena Okafor

Rationale: This matters because an open time on the calendar does not mean you have them both ready.

Acceptance check: Try scheduling a same day appointment without 1 of the 2 requirments to make sure the appointment cannot be offered unless they're both fulfilled

Priority: Must · **Validation:** Confirmed by Dr. Lena Okafor

Conflict or decision: An appointment should only be marked as ready when both a room and a qualified clinician are available.

R-04 · functional

Requirement: The system must inform staff and visitors when an appointment's readiness changes after confirmation.

Source: W04-S02 · Dr. Lena Okafor

Rationale: Staff and visitors need updated information so they know what to expect while only sharing information that is required to move forward.

Acceptance check: Change the readiness of a confirmed appointment and make sure the affected staff and visitor receive updated information without clinical details

Priority: Must · **Validation:** Confirmed by Dr. Lena Okafor

Conflict or decision: An appointment should only be marked as ready when both a room and a qualified clinician are available.

R-05 · user

Requirement: The system must let authorized staff see a visitor's language, communication preferences, and approved support needs when confirming, rescheduling, or checking in for an appointment.

Source: W04-S03 · Priya Shah

Rationale: Suthorized staff need access to the visitor's communication and support needs throughout the process so they can provide the right assistance.

Acceptance check: When staff check an appointment during confirmation, rescheduling, or check-in they should be able to see the visitor's language, communication preferences, and approved support needs.

Priority: Must · **Validation:** Confirmed by Priya Shah

Conflict or decision: Authorized staff should be able to see a visitor's language, communication preferences, and approved support needs throughout confirmation, rescheduling, and check-in.

R-06 · constraint

Requirement: The system must give visitors the option to use a phone or receive help from staff if they are unable to use the portal.

Source: W04-S03 · Priya Shah

Rationale: Visitors should still be able to access the service even if they cannot use the portal.

Acceptance check: Have a visitor try using the phone and getting help from staff to make sure both options allow them to access the service without using the portal.

Priority: Must · **Validation:** Confirmed by Priya Shah

Conflict or decision: Authorized staff should be able to see a visitor's language, communication preferences, and approved support needs throughout confirmation, rescheduling, and check-in.

R-07 · nonfunctional

Requirement: The system must only display the information staff need to do their tasks. Staff should only be able to see more detailed information if they are authorized.

Source: W04-S04 · Jordan Kim

Rationale: Staff should only be able to see the information necessary for their work.

Acceptance check: Have staff check a shared display to make sure it only shows the necessary information and that detailed information is limited to authorized staff.

Priority: Must · **Validation:** Confirmed by Jordan Kim

Conflict or decision: The system should only show staff the information they need based on their access. It must also keep track of who changed an appointment's status, what it was before and after, and when the change happened.

R-08 · functional

Requirement: The system must keep track of who changed an appointment's status, what the status was before and after the change, and when it was changed.

Source: W04-S04 · Jordan Kim

Rationale: The system must record who updated an appointment's status, what the old and new statuses were, and the time the change was made.

Acceptance check: Change an appointment's status and check the history to make sure it shows who made the change, the old status, the new status, and the time.

Priority: Must · **Validation:** Confirmed by Jordan Kim

Conflict or decision: The system should only show staff the information they need based on their access. It must also keep track of who changed an appointment's status, what it was before and after, and when the change happened.

Professional Guidance Assessment

IIBA: IIBA is a professional association that contributes guidance to help business analysts understand problems, work with people, and write requirements.

ISO/IEC/IEEE 29148: Together, they publish ISO/IEC/IEEE 29148, which provides standards that help make requirements clear and easy to test.

PMI: PMI focuses on project delivery, while Week 4 focuses on understanding and writing requirements before the project begins.

Application: The guidance helped me make R-01 clearer by explaining the difference between held and ready so staff know what each status means.

Prepared in Command Nexus. Canvas remains the official submission point.
